AMS3-GS+

GPS Antenna Alignment System

Features

- High precision, GPS measurement-system
- Uses GPS, Galileo, Glonass and BeiDu
- Azimuth- and tilt measurement ($0.7^{\circ}\text{RMS} / \pm 0.2^{\circ}$)
- Precise Position ($<5\text{cm}$) with online correction
- Lightweight solution: $<2500\text{g}$ ready to use incl. universal antenna mounting system
- Fits all antenna sizes
- Ultra compact
- Battery power for up to 8h
- Easily controlled via smartphone
- Voice output instructions for quick alignment
- Easily integrated due to XML-protocols
- Online data exchange
- Complete wireless operation
- Weatherproof IP65
